Service Maintenance & Repair

FM Environmental Ltd has over 40 years experience installing pumping and wastewater treatment equipment. The company recognises the necessity for comprehensive back-up maintenance and servicing facilities to ensure reliable long-term operation of such equipment.

The Service Division of FM Environmental Ltd. has led the way for many years providing our customers with the complete after-sales service which includes:

- *Prevention maintenance programmes*
- *Operation & maintenance management contracts*
- *24 hour emergency call out facilities*
- *On-site repairs / workshop repairs*
- *Collection / delivery of plant and equipment*
- *Fully qualified, experienced service engineers*

Consequences of not Maintaining Sewage Equipment

- *Premature failure of critical equipment*
- *Possible pollution and smell*
- *Potential prosecution by Local Authority*
- *Costly repairs/replacement of equipment*

Benefits of Service Agreement for Plant and Equipment

- *Regular planned maintenance of equipment by experienced engineers*
- *Improved reliability of system*
- *Peace of mind*
- *Major cost savings in long term*
- *Access to out-of-hours callout numbers*
- *Health and safety considerations*

Service *Maintenance & Repair* Preventative Maintenance Programmes

Periodic preventative maintenance by professional engineers will ensure the trouble-free operation of pumps and waste water treatment equipment. General Maintenance can be carried out on-site while more specialised repairs can be facilitated at the Company's Service and Repair Workshop. Frequency of service visits can be determined by the needs of the customer and the type of equipment to be maintained. As with most machinery, regular maintenance and attention is critical if troublesome breakdowns and costly repairs are to be avoided.

Operation & Maintenance Management

Taking responsibility for the operation and maintenance of pumping and wastewater treatment equipment is a service now available from FM Environmental. This service incorporates preventative maintenance, day to day general maintenance and emergency response maintenance to ensure total customer peace of mind in respect to the equipment installed. 24hour remote monitoring of plant, effluent sampling and analysis, and regulat liaison with Local Authorities can all be included in a customer-tailored Operation and Maintenance Management Contract.

Grease Guardian Maintenance

FM Environmental's Service Division has expanded to incoropte the same after-sales service for its range of Grease Guardian equipment. All the benefits of our Service Divison are now available to our Grease Guardian customers.
