

JOB DESCRIPTION

Title: Installation & Service Engineer

Reporting to: Operations Manager

Location: Newry/Home based

Area Covered: Northern Ireland and Ireland

Salary: Negotiable depending on experience

Hours of work: 8:00 to 5:00 Mon-Wed

8:00 to 4:30 Thurs

8:00 to 3:00 Friday

Role: To be responsible for all aspects of the day to day operation of individual minor works contracts under your control, from formal receipt of file through procurement and installation of materials to the preparation of final account and job handover.

Job Description

- All aspects of the installation, servicing and repairs of pumping, effluent and ancillary equipment.
- Installation of MEICA, mechanical, electrical, installation, control and automation equipment on NI Water's water and wastewater treatment installations throughout Northern Ireland.
- Installation, commissioning and servicing of pumping and effluent treatment equipment on domestic, commercial and industrial applications.
- Comprehensive knowledge of working to RAMS in the water industry.
- Working to the procedures and completion of all documentation to comply with ISO 9001 OHSAS 18001; ISO 14001.
- Ensuring proper care and maintenance of all equipment supplied by FM Environmental

The above list of duties must not be considered comprehensive. They are a summary of the main responsibilities that the successful candidate will be required to undertake.

Criteria

- Minimum 3 years' experience within the water and wastewater treatment equipment
- Qualified in electrical installation and testing to the 17th Edition
- Instrumentation knowledge desirable
- Experience on NI Water Base Maintenance contracts
- Confined Space Training
- EUSR Water hygiene trained
- Clean driving license
